

Making the most of your home

Spring is finally on the way, meaning many homeowners' thoughts will be turning to home improvement. Whether you are looking to replace your windows and doors or add a bespoke conservatory, Twyford Windows can help you enhance your home without breaking the bank.

All home improvements add to the value of your property, and this is certainly the case with the addition of a quality conservatory from Twyford Windows. With rising property prices making it more difficult than usual to climb to that next rung on the property ladder, adding a conservatory is a great way of creating extra living space. They also help link your house with the garden, and make best use of what warmth and light there is available all year round. If you're not sure how a conservatory could work at your property, Twyford Windows' computer-aided design service enables homeowners to visualise how their expanded and improved house will look, tweaking the details until they are completely happy with the plans.

Indeed, whatever home improvement project you have in mind this year, the team at Twyford Windows can give you expert advice. They are experienced enough to know when an idea needs no refinement, a little tweaking or to propose ideas that you may not have considered. Business owner Kevin Brown brings a wealth of know-how to the art of home improvement and is committed to providing an excellent service at reasonable rates.

To help inspire you on what is possible, why not pop in to the Twyford Windows showroom, in the heart of Twyford village, to see samples of some of the products they can supply. These products - from top quality 'A' rated energy efficient windows and doors to the soffits, fascias, cladding, flat roofs and conservatories - are all among the best available on the market today. There is also a huge

range of styles and designs on offer to suit all tastes and budgets.

Kevin runs the business with the help of his partner, Paloma. They work closely with window repair specialists David Hamilton and use the very best specialist fitting teams for new installations. You can rest assured that everyone involved has to meet the highest standards of professionalism in order to be associated with Twyford Windows.

A Ruscombe resident as well as a Twyford business owner, Kevin also works hard to support the local community and is heavily involved with the Twyford Village Partnership, the non-profit organisation that works for the good of the community. Twyford Windows is also a founding member of the Twyford Village Partnership business forum and has played a central role in several key projects - including supplying a conservatory at cost for the extension at Age Concern's Twyford Centre. The community-minded business was proud to be named TVP business of the year in 2011 and runner-up in 2013.

Over the years the business has helped give many homes in the area a new lease of life. Whatever home improvement project you are looking to undertake, look no further than Twyford Windows.
